

Realize it **starts** with you

At the University of Regina, we like to say that our university is YOUR university. Whether you are pursuing a degree or taking non-credit classes, whether you are actively interested in our growing program of research or your company is partnered with the University as part of our Cooperative Education program, whether you come to campus often or drop in from time to time – we value that relationship and we are always looking for ways to strengthen our connection to you.

This fall we will tour the province to further engage with communities where our staff, faculty and students hail from; where we conduct research – communities we are building lasting partnerships with. We will focus on strengthening our connection to high school students across the province. On October 21 and 22, we will host UR Connected! an annual event opening the campus to hundreds of grade 12 students who we hope will bring their passion and talent to the University as incoming students. By bringing grade 12 students on campus they will have the opportunity to experience the many great things about the U of R – the greatest among them being our people with their enthusiasm for knowledge.

Students, faculty and staff come to our campus because they know the University is the perfect place to help them realize their personal and professional goals. Our students are especially noted for realizing their career goals after graduation – just one sign of success that we feel good about. One of the ways we prepare our students for successful careers is through our longstanding Co-operative Education program, through which our students earned more than \$7 million last year toward their education. We also offer a growing number of experiential learning opportunities allowing our students to work in the community as part of their course work.

Academically, professionally, in the sporting arena or on stage, our students shine long after they leave our campus, and continue to make us all proud of their many successes.

We are a growing community, a diverse and committed group of people who respect differences and build partnerships. We collaborate, we debate, we explore and create. Our community is creating a better world. You are an important part of that community.

Realize. It starts with you.
