Employees recognized for outstanding service

Denise Lindenbach and Marnie Jeworski

Every year U of R employees recognize their colleagues who provide administrative and support services by nominating them for awards for outstanding service. Administrative and support employees perform many of the behind-the-scenes roles that help keep the campus running smoothly - everything from providing a wide range of services to students and instructors, to making sure classes are scheduled for the right room at the right time, ensuring computers are operating properly, and keeping the buildings clean.

This year's award recipients are Marnie Jeworski from the Faculty of Graduate Studies and Research, and Denise Lindenbach from the Faculty of Education.

Jeworski was among the nominees from the CUPE group which included: Katharine Burgart, Department of Psychology; Lorne Common, Physical Plant; Therese Dibble, Department of Chemistry and Biochemistry; Donalda Kozlowski, Office of the Registrar; Don Larson, Physical Plant; and Elita Paterson, Centre for Academic Technologies. Lindenbach was nominated from the APT group, along with Judy Amundson, Residence and Conference Services; Phyllis Bend, Dr. Paul Schwann Centre of Applied Health and Research; and Arnold James, Physical Plant.

Jeworski and Lindenbach will each receive a framed certificate at the fall convocation as well as a \$1,000 award for their professional development account.

Although she still doesn't know why she received the award, Jeworski stresses the pride she takes in helping students.

'They put a tremendous amount of time and effort into their programs, and a lot of them are away from their homes and families,' Jeworski says. 'Since my family is everything to me, I can only imagine how difficult it is for them. It's very important to me to make them feel welcome.'

Jeworski's efforts on behalf of students is confirmed by one of her nominators, who wrote: '...I have come to recognize that there are a number of qualities I could highlight, but none more so than her treatment of, and her advocacy for, the students. Her top priorities are the welfare of the graduate students and the academic integrity of the Faculty of Graduate Studies and Research. She is the embodiment of the facilitator who can help you to make things right, with disregard of whether it may involve her personal inconvenience.'

Lindenbach was shocked when she learned she'd been chosen from among the nominees in the APT group. She credits good role models at the University and her parents for teaching her how to delegate responsibilities and trust people to do what is asked of them.

'My mother is coming to Convocation to see me receive the award, which is special,' says Lindenbach. Besides her regular duties with the Faculty of Education, she has served on several on-campus committees and played a central role when the Education Library moved to the main Library building.

Will she be nervous when she steps on stage to receive her award? 'I'm used to having eyes on me,' says Lindenbach, who has performed for many years with the Prairie Gold Chorus and the Sweet Adelines. 'But I'm glad I don't have to give an acceptance speech. I'd rather sing it than say it,' she jokes.

FACES ON CAMPUS

The first thing you are likely to see when you enter

the Department of International Languages is the bright smile of Kanthie Seresinhe, who handles much of the administrative work for this relatively new department. Her smile comes easily, she says, because, 'I feel very privileged to work in a department like this.'

Seresinhe has seen the evolution of the department, which was known as the Department of Germanic Studies

Kanthie Seresinhe

when she began working there in 2000. It expanded to become the Department of International Languages in March 2003 when it assumed responsibility for language courses in four languages - German, Japanese, Chinese and Spanish, plus Korean during the summer - offered by the University.

'It is a unique place,' says Seresinhe, 'and very cosmopolitan because of the many nationalities of the students who come here and the faculty members who work here. With 564 students registered, I get a lot of questions, and I spend a lot of time directing them to the right people. I enjoy being able to help, and when I can help them, things flow better for them and for me.'

Seresinhe adds her own cosmopolitan touch to the department. Her native tongue is Sinhalese, which she learned - along with English - while growing up in Sri Lanka. This semester she's also taking time out from her administrative work to be a student, attending a culture and civilization course in Germanic Studies. 'It's not in the calendar yet,' she says with a laugh, 'but I hope that with the courses I've already completed, I'll earn a certificate in German very soon.'
